## Indian Language Data Processing

- We need a model based on the grammatical properties of Indian Languages (IL) to write programs to analyse, study, synthesise IL i/o.
- Paninian Grammar for Samskritam is extensively studied for this purpose and quite a few systems are available now.
- Phonetic Character Set, words, Sentences, discourse etc. are to be suitably characterised and used.
- Logical relations between word-meaning, compatibility, intentions etc. needed for proper study
- Spoken aspects are very important as the IL are fundamentally phonetic based.

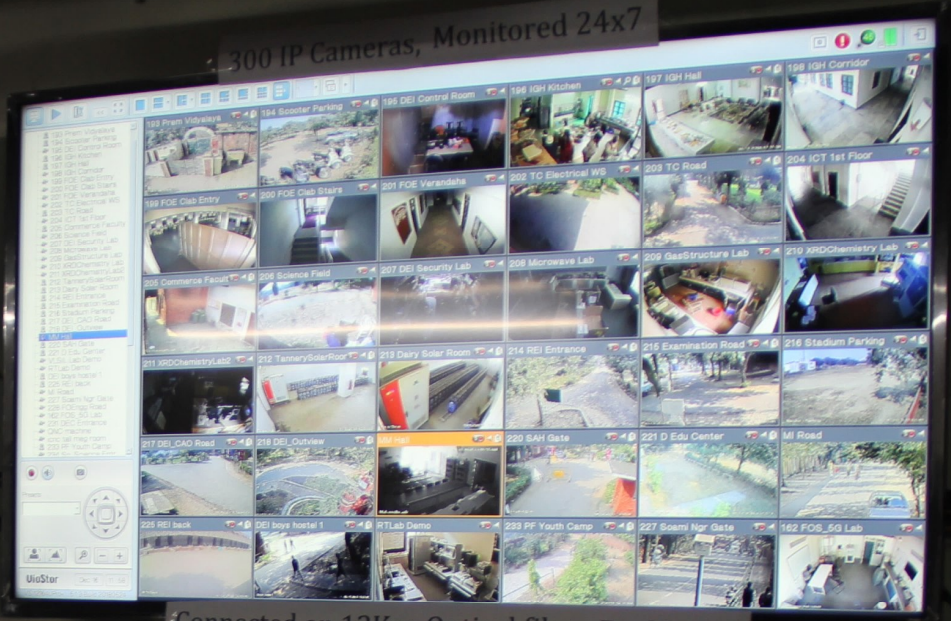

DEI-Dayalbagh Security Surveillance System

Designed, Deployed, and Maintained by  
DEI Staff & Students as Social Responsibility

300 IP Cameras, Monitored 24x7

Connected on 12Km Optical fiber Backbone
